

EUROPEANS WILL DISARM TRIDENT AT AWE BURGHFIELD ON WEDNESDAY 8th JUNE 2016

The UK Government is intent on replacing and modernising its nuclear weapon system which is a threat to everyone on the planet. Much of the work on the new system will be carried out at AWE Burghfield near Reading in Berkshire, where major building work is already being carried out. This military base is responsible for the final assembly and maintenance of nuclear warheads.

Anti-militarists from all over Europe will join the RESIST, PROTEST, DISRUPT Month of Action in June. **Please join us.**

Global climate change and nuclear weapons are both existential threats, threatening the future of life on this planet. They both stem from the same military industrial complex embedded in our corporate controlled growth economy. War must stop for global warming to slow down.

As concerned international citizens we are demanding that the UK comply with their obligations under international law to accomplish the total elimination of their nuclear arsenal. This will send a message to the world that spending for peace and sustainable development and meeting people's real needs is an urgent priority and that all spending on weapons of mass destruction must stop

For more information on how to join this nonviolent protest please contact june@tridentploughshares.org
